

View Prune

Additional Information

- Once we receive your completed application, you will be contacted to organise a site inspection with a Council arborist.
- All costs of view pruning are to be borne by the person requesting the work. After the site inspection and if the proposed works have been approved, the applicant will be notified in writing of the costs. Payment of these monies is required before any works are scheduled.
- The processing period for applications is approximately 30 working days from the payment of the outstanding balance.
- Notification of application to adjoining residents may be required if a request will significantly affect the surrounding landscape character of an area.
- A Tree Preservation Order applies to all trees in the Municipality of Woollahra with a spread of branches greater than three metres and also on all trees, irrespective of the spread of branches, with a height greater than five metres.
- This Order prohibits the ringbarking, cutting down, topping, lopping, pruning, removing, transplanting, injuring or wilful destruction of such trees, except with the prior written consent of the Council.
- View pruning work will only be carried out by Council staff or Council's preferred contractors.
- Council will only consider a request to undertake view pruning of a tree once in any 12-month period.
- Council reserves the right to refuse an application to view prune a tree, even where all the criteria have been met, if the requested pruning would be detrimental to the health or structure of the tree. Refusal on one occasion will not preclude the applicant from making another application up to two years from the date of the original refusal.
- Trees located in parks may be pruned if all complying criteria has been met.
- Applications will ONLY be accepted by property owners. Council will not accept applications from tenants.
- All pruning works are carried out giving consideration to the Australian Standard AS4373-2007 Pruning of Amenity Trees and WorkCover Code of Practice 'Amenity Tree Industry', 1998.
